Atty. Dkt. No. 040447-0238

Amendments to the Specification:

Please amend the specification as follows:

On page 1, paragraph beginning at line 15, amend as follows:

Various considerations have been made on this protocol in the WAP forum, and the latest versions of WAP are on public view in associated WEB sites. According to the specification titled "WAG UAPROF Version 10-Nov-1999 (Wireless Application Group User Agent Profile Specification)" of the above WAP latest versions, it is provided that parameters indicating the WAP content processing capability of a WAP client and a desired content format are transmitted as CPI (Capability and Preference Information) to a WAP gateway when ~~an session~~a session is established between the WAP client and the WAP gateway and also the parameters are cached at all times when the session is established.

On page 7, paragraph beginning at line 6, amend as follows:

Fig. 2 is a block diagram showing the construction of the WAP terminal 2 of Fig. 1. In Fig. 2, the WAP terminal 2 is equipped with antenna 20, sharing device 21, ~~receiving~~ reception portion 22, ~~transmitting~~transmission portion ~~22~~23, WAP data decoding portion 24, WAP data encoding portion 25, ~~controlling~~control portion 26, memory portion 27, display portion 28 and input portion 29, and wireless communications are carried out between the WAP terminal 2 and the WAP gateway 1.

On page 7, paragraph beginning at line 13, amend as follows:

The antenna 20 of the WAP terminal 2 transmits/receives wireless signals. The sharing device 21 is used to commonly use one antenna 20 for both of a received wireless signal and a wireless signal to be transmitted. The wireless signal received is input through the sharing device 21 to the ~~receiving~~reception portion 22, and the transmission portion ~~24~~23 inputs the wireless signal to the sharing device 21.
